Detailed Action

Sequence Compliance

1. This application contains sequence disclosures at page 31 that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. Appropriate correction is required.

Claims Status

2. Claims 1-33 are pending

Election / Restriction

- Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Group I, consisting of claims 1-8 and 11-19 drawn to a method to produce a nanoporous product, classified under Class 436, subclass 174, for example.
 - Group II, consisting of claims 9-10 drawn to a method to measure kinetics, i.e., analysis, classified under Class 435, subclass 287.2, for example.
 - Group III, consisting of claims 20-21 and 25 drawn to a method to analyze a product, classified under Class 436, subclass 43, for example.
 - Group IV, consisting of claims 22-24 drawn to a method to preserve a product,
 classified under Class 435, subclass 260, for example.

- Group V, consisting of claims 26-29 drawn to a multiple step method to produce a product, classified under Class 435, subclass 41, for example.
- Group VI, consisting of claims 30-33 drawn to a system. i.e., an apparatus to react components and analyze product formed, classified under Class 435, subclass 287.1, for example.
- 3. The inventions are distinct, each from the other because of the following reasons:

Inventions in Groups I to VI are unrelated to each other because they are directed to different inventions that are not connected in design, operation and/or effect. These inventions are independent since they are not disclosed as capable of use together. They have different modes of operation, they have different functions, and/or they have different effects. One would not have to practice the various methods at the same time to practice just one method alone (MPEP § 806.04, MPEP § 808.01). In the instant case, for example inventions disclosed in claims encompassing inventions in Group I are directed to a method to produce a nanoporous product, while invention encompassing claims for group VI is drawn to system comprising an apparatus and a method to make and analyze said product made in said apparatus.

The inventions discussed above are independent and distinct, each from the other. They have acquired a separate status in the art as a separate subject for inventive effect and require independent searches. The search for each one of the above inventions is not coextensive particularly with regard to the literature search. Further, a reference that would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally, the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all of the above inventions in one application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification (i.e., class and subclass), and their recognized diverse subject matter, restriction for examination purposes as indicated is proper.

Species Election

- 4. This application contains claims directed to different methods comprised of a variety of ingredients/steps. Therefore, if applicant elects either of Groups I or III above, applicant must also make election of species by electing a single species from each of the following categories:
 - a. Elect one among: adjust diffusion rate, material characteristics, or other from those in Claim 8;
 - b. One among: enzymes, metal complexes, or platinum as listed in Claim 12;
 - c. One enzyme: among those listed in Claim 13;
 - d. One biological component other than enzyme: as listed in Claim 16; or one product among those in Claim 17; or one cleavage product among those listed in Claim 18.
- 5. However, if the applicant elects the claims encompassing invention in Group III above, applicants must elect single method of analysis among those listed in Claims 21 or 25.
- 6. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

In accordance with 37 CFR 1.499, applicants are also required that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently

added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species [MPEP § 809.02(a)].

- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention and species, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Kailash C. Srivastava whose telephone number is (571) 272-0923. The examiner can normally be reached on Monday to Thursday from 7:30 A.M. to 6:00 P.M. (Eastern Standard or Daylight Savings Time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn, can be reached on (703) 308-4743 Monday through Thursday. The fax phone number for the organization where this application or proceeding is assigned is (703)-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.

Kailash C. Srivastava, Ph.D.

NOTICE TO COMPLY WITH DECI	Dr. Kailash C. Srivastava	1651					
NOTICE TO COMPLY WITH REQUIREMENTS FOR PATENT APPLICATIONS CONTAINING NUCLEOTIDE SEQUENCE AND/OR AMINO ACID SEQUENCE							
DISCLOSURES							
Applicant must file the items indicated below within the time period set the Office action to which the Notice is attached to avoid abandonment under 35 U.S.C. § 133 (extensions of time may be obtained under the provisions of 37 CFR 1.136(a)).							
The nucleotide and/or amino acid sequence disclosure contained in this application does not comply with the requirements for such a disclosure as set forth in 37 C.F.R. 1.821 - 1.825 for the following reason(s):							
1. This application clearly fails to comply with the requirements of 37 C.F.R. 1.821-1.825. Applicant's attention is directed to the final rulemaking notice published at 55 FR 18230 (May 1, 1990), and 1114 OG 29 (May 15, 1990). If the effective filing date is on or after July 1, 1998, see the final rulemaking notice published at 63 FR 29620 (June 1, 1998) and 1211 OG 82 (June 23, 1998).							
∑ 2. This application does not contain, as a separate part of the disclosure on paper copy, a "Sequence Listing" as required by 37 C.F.R. 1.821(c).							
4. A copy of the "Sequence Listing" in computer readable form has been submitted. However, the content of the computer readable form does not comply with the requirements of 37 C.F.R. 1.822 and/or 1.823, as indicated on the attached copy of the marked -up "Raw Sequence Listing."							
5. The computer readable form that has been filed with this application has been found to be damaged and/or unreadable as indicated on the attached CRF Diskette Problem Report. A Substitute computer readable form must be submitted as required by 37 C.F.R. 1.825(d).							
☐ 6. The paper copy of the "Sequence Listing" is not the same as the computer readable from of the "Sequence Listing" as required by 37 C.F.R. 1.821(e).							
☐ 7. Other:							
Applicant Must Provide: ☑ An initial or substitute computer readable form (CRF) copy of the "Sequence Listing".							
\boxtimes An initial or substitute paper copy of the "Sequence Listing", as well as an amendment directing its entry into the specification.							
☑ A statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 C.F.R. 1.821(e) or 1.821(f) or 1.821(g) or 1.825(b) or 1.825(d).							
For questions regarding compliance to these requirements, please contact:
